New Federal Rules Impact YOUR Future PWCF Creates New Tools to Keep Your Loved One Safe

The intent of the Center for Medicare & Medicaid Services Home & Community-Based Services Rules and Regulations is to "deinstitutionalize" people with disabilities, integrate them into the community to the same degree as non-disabled individuals. While honorable in their intent, the new Rules present unintended dangerous, life-threatening consequences for persons with PWS. PWCF created new tools to help keep your loved one safe. Families Click Here and Residential Providers Click Here to learn more and to access these new life saving tools.

"PWS Behavior Management Strategies: Beyond the Basics" Available on Flash Drive and Youtube Stream

PWS is unlike any other developmental disability and arguably one of the most complex and misunderstood. Presented by Lisa Graziano, M.A., this four hour training course will give you the tools you need to reduce unwanted behavior common amongst persons with PWS. Topics include how to manage the medical aspects of PWS as they impact behavior, how to create a supportive PWS-environment, how most persons with PWS think, and tons of specific PWS-specific strategies and interventions to help you starting today!

Flash drive available in the Store or download the Order Form. Contact the PWCF Office to stream via Youtube.
